DataCatalyst Öresund Logo guidelines

To ensure compliance with EU/Interreg ÔKS communication requirements, please follow the logo guidelines when preparing project-related material.

1. The Interreg ÖKS and DataCatalyst Öresund logos must always be included in any material produced within the framework of the project.

2. The EU flag in the Interreg ÖKS logo must be at least 1 cm high. No other logo may exceed the total height or width of the EU flag. View the Interreg ÖKS guidelines and download the Interreg ÖKS logo here.

3. The logos may be used either in full colour or in their white versions.

4. On websites, ensure that the Interreg ÖKS logo is visible without additional clicks (e.g. on datacatalyst-oresund.eu), so that visitors can easily identify the EU/ÖKS support.

5. For presentations related to DataCatalyst Öresund, include both logos on at least the first and last slides.
